

GramUnnati

1. Project Overview

GramUnnati is a All-in-one e-commerce platform tailored for the agricultural sector. It connects farmers (buyers) with sellers of agricultural products and services. The system features a centralized Admin Dashboard to manage users, orders, sellers, and platform-wide configurations.

2. Goals

Farmers

- Provide farmers with the right marketplace and price for their agricultural products.
- Take agricultural products from villages to the global market through the GramUnnati App.
- Increase production and profit with the help of technology.
- Make the GramUnnati App a marketplace for farmers.

Rural Industries

- Provide financial support, training, and empowerment to rural entrepreneurs.
- Bring entrepreneurs together and build a strong trading community.
- Take rural industry products to the global market through the GramUnnati App.
- Create opportunities for industries within villages.
- Provide economic growth to rural industries through the GramUnnati App.

Self-Help Groups

- Empower women financially.
- Make women self-reliant and encourage regular product creation.
- Take Self-Help Group products beyond villages to the global market.
- Provide women with business and employment opportunities.
- Help Self-Help Group women achieve sustainable income through the GramUnnati App.

3. Vision

To build a self-reliant, prosperous and self-sufficient rural India where every family can earn a dignified livelihood within their own village and there is no need to migrate to cities.

4. Our Values

- **Empowerment:** Enable rural women and youth to become local entrepreneurs through digital tools.
- **Self-Reliance:** Create economic independence through production, packaging and distribution within villages.
- **Transparency:** Build trust through honesty in pricing, transactions and profits.
- **Sustainability:** Promote environmentally responsible local production and a sustainable rural economy.
- **Technology for Good:** Make technology simple and accessible for local and social development.
- **Community Prosperity:** Bring every business decision together for the overall development of the village.
- **Cultural Pride:** Give local skills, traditions and products a national identity.

5. What the System Does

Area	Purpose
User Management	Register, login, and manage profiles for Buyers, Sellers, and Admins.
Seller Onboarding	Sellers submit documents and details for admin approval before they can sell.
Product Catalog	Sellers can list products, variants, and combos based on a central Admin-defined Product Master.
Shopping Cart & Orders	Buyers can add variants/combos to their cart, checkout, and track their orders.
Offers & Coupons	Sellers can create percentage or flat-discount coupons and offers for their products.
Shipment Tracking	Tracks order delivery states from placement to delivery.
Complaints System	Allows users to raise tickets against orders or payments for Admin resolution.
Ad Banners	Admins can configure promotional banners targeted at specific users or globally.
Push Notifications	Sends real-time alerts to mobile devices via Firebase Cloud Messaging (FCM).

6. Platform Ecosystem

- Buyer Mobile App – a mobile application for farmers/buyers to purchase products.
- Seller Mobile App – a mobile application for sellers to manage inventory, orders, and shop profiles.

7. Key Features

- Buyer Mobile Application
- Seller Mobile Application
- Product Catalogue
- Product Variants and Combos
- Shopping Cart and Orders
- Offers and Coupons
- Shipment Tracking
- Complaints System
- Ad Banners
- Push Notifications
