

GramUnnati

Gkart– SHG Delivery Partner App

Self-Help Group Operations, Pickup & Delivery Management

1. Problem Statement

Self-Help Groups need a simple digital system to receive delivery-related work, manage assigned orders, coordinate pickups and update order progress while supporting GramUnnati's rural delivery network.

2. Our Solution

Gkart provides SHG delivery partners with a mobile application to manage assigned pickup and delivery activities, update order statuses, coordinate with the GHub logistics platform, and support reliable movement of orders between sellers, hubs and customers.

3. Project Overview

Gkart is the SHG-side mobile application within the GramUnnati logistics ecosystem. It connects Self-Help Group delivery partners with GHub for order assignment, pickup, movement and delivery operations.

4. Goals

Self-Help Groups

- Receive and manage assigned logistics orders.
- Coordinate pickup and delivery activities through a mobile workflow.
- Update order status as the shipment moves through each stage.
- Support local logistics and delivery-related opportunities for SHG members.

GramUnnati Logistics

- Connect SHG delivery partners with the centralized GHub order management system.
- Maintain visibility of order movement and operational status.
- Support coordinated pickup, hub and delivery workflows.

5. Vision

To create a simple digital delivery workflow that enables Self-Help Groups to participate effectively in GramUnnati's logistics network and connect rural products with customers.

6. Our Values

- Empowerment: Enable SHG members to participate in organized digital delivery operations.
- Self-Reliance: Create opportunities for local income through structured logistics activities.
- Transparency: Provide clear order assignments and status visibility.
- Technology for Good: Keep the mobile workflow simple and accessible.
- Community Prosperity: Strengthen the role of SHGs in the rural logistics network.
- Sustainability: Support efficient local movement of products.

7. What the System Does

Area	Purpose
Registration & Profile	Allows SHG delivery partners to register, maintain their profile and manage relevant account information.
Order Assignment	Displays orders assigned to the SHG and provides the actions required for the assigned logistics task.
Pickup Workflow	Supports pickup activities and updates the order as the parcel is collected.
Order Status Updates	Keeps the logistics platform updated as the order progresses through operational stages.
Delivery Workflow	Supports delivery-side activities and status updates for assigned orders.
Return Support	Supports return-related order activities when a return is assigned to the SHG workflow.
Notifications	Provides relevant order and operational updates to the SHG delivery partner.

8. Platform Ecosystem

- Buyer/Seller Apps – Create and manage the underlying commerce orders.
- GHub – Central logistics hub for order assignment and operational management.
- Gkart– SHG-side mobile application for assigned delivery operations.
- GKart – Transporter-side mobile application for transportation activities.
